

DANCE WORKSHOPS & INTENSIVE TRAININGS — 2025

#1 NEWSLETTER 2025

Dear dance adventurers,
last year, we've developed fruitful collaborations which sustain our wish of sharing the dance and our work more locally and regionally, after two decades of intense travelling to support through teaching and collaborative projects, the development of many dance and CI communities worldwide.

We are happy to continue creating diverse frameworks for individual and collective learning and exchange through dance and the multiplicity of the encounters it provides. Our eco-somatic practices invite us to question, deepen and broaden our perception, sensitivity, awareness, curiosity and imagination. To attend to the body/environment interrelationships, where embodied communication, connection, empathy, understanding, respect and trust can be practiced and developed. These are the treasure tools we can offer to our terrestrial society.

Find here our proposals x 2025. Please share, join, support.

We are looking forward to meet you in the studio and share the dance.

Our best wishes,

dani - ecki
